Of course each person would be working from their own screen, but since the playing fields overlap there could be problems with running into each other if someone is not careful. The first person to finish is the winner. If you only have one GPS then the contests can be serial with everyone remembering their finish time.

route after setting the destination, which can help users to arrive the destination safely and rapidly.

### **GPS MODEL 17**

You'll get a more realistic figure by looking in the specification section of your GPS receiver's user-manual. Typically, with a handheld GPS, 95% of horizontal GPS positions will be within 10 metres of their true location. The error in altitude will probably be at least twice the horizontal error.
