In software engineering and programming language theory, the abstraction principle (or the principle of abstraction) is a basic dictum that aims to reduce duplication of information in a program (usually with emphasis on code duplication) whenever practical by making use of abstractions provided by the programming language or software libraries [citation needed].

Abstraction principle (computer programming) - Wikipedia

Code Explanation:-We first define the abstract class. Note the use of the abstract keyword. This is used to denote that the class is an abstract class. Next, we are defining our method which does nothing. The method must have the keyword called virtual. This means that the method cannot be changed by the child class.
