~~117-06 Specifications for Tolerances for Concrete ...~~

Refer to ACI 543R for concrete piles having diameters smaller than 30 in. (760 mm), piles installed by the use of hollow stem augers, or other pile types. Also beyond the scope of this report are rectangular columns on spread footings in deep excavations and foundations constructed without excavations by methods such as mortar intrusion or ...

only. It does not form a part of Specification ACI 336.1. F2. ACI Specification ACI 336.1 is a Reference Specification to be used by incorporation in its entirety in the project specifications. Individual sections, articles, or paragraphs shall not be copied into the Project Specifications, because taking them out of context may change their meanings. If

~~336.3R-14 Report on Design and Construction of Drilled Piers~~

Because the design bearing value is based on certain 336. with acii to strength and compressibility, the Design Geotechnical Engineer should decide the type and amount of testing necessary to satisfy the design assumptions.

~~ACI 336.1 PDF—PDF Radicalism~~

The 30 in.(760 mm) diameter boundary is an arbitrary size; smaller-diameter drilled piers can be designed and installed in accordance with ACI 543R. Although determination of overall pier size and concrete section design are two basic drilled pier design procedures, emphasis is focused on the determination of overall pier size, which is affected by the interaction between subgrade and pier.

~~ACI 336.1 : Specification for the Construction of Drilled ...~~

ACI-336.1-01: Specification for the Construction of Drilled Piers covers requirements for drilled pier construction. It included delivery, handling and storage of the casing, excavation, soil testing, placing of concrete and reinforcing steel and inspection.

~~336.1-01: Specification for the Construction of Drilled ...~~

This report covers design and construction of 30 in. (760 mm) diameter or larger foundation piers constructed by excavation of a hole in a subgrade that is later filled with concrete. The 30 in.(760 mm) diameter boundary is an arbitrary size; smaller-diameter drilled piers can be designed and installed in accordance with ACI 543R.

This Practice supplements ACI 336.1-01, Specification for the Construction of Drilled Piers. this Practice and ACI 336.1-01 provide requirements for drilled pier construction. Practice for the construction of drilled piers. piers as caissons or drilled shafts.

~~ACI 336.3R—Report on Design and Construction of Drilled ...~~

Commentary synopsis: This report is a commentary on the Specifications for Tolerances for Concrete Construction and Materials (ACI 117). It is intended to be used with ACI 117 for clarity of interpretation and insight into the intent of the committee regarding the application of the tolerances set forth therein.

~~Reported by ACI Committee 336 ACI 336.3R-14~~

ACI 336.3R - Report on Design and Construction of Drilled Piers Published by ACI on August 1, 2014 This report is generally limited to piers of 30 in. (760 mm) or larger diameter, made by open or slurry stabilized construction methods.

336.3R-1 Design and Construction of Drilled Piers Reported by ACI Committee 336 ACI 336.3R-93 (Reapproved 2006) Covers the design and construction of foundation piers 30 in. (760 mm) in diameter or larger made by excavating a hole in the earth and then filling it with concrete. Smaller-diameter piers have been used in noncollapsing soils.
