Implants
Hearing loss can benefit from
medical hearing devices, such as
hearing aids, cochlear
implants, middle ear
implants, active bone
conduction implants
and other assistive
devices. These devices
represent cost-
effective strategies in
treating hearing loss
(Wilson et al., 2017).

Why bother with surgery for middle ear implants when current hearing aids have the ability to amplify sounds even for those with severe hearing loss? That was an important question for me before I started with middle ear implants in 2006, at a time when it was in its infancy still worldwide and the first of its kind in Asia.
