ActionScript 3 is the programming language for the Adobe Flash Player and Adobe AIR runtime environments. Programmers of all levels—beginner, intermediate, and advanced—will find useful content on this page. Explore the language's object-oriented programming model and its fundamental building ...

Learning ActionScript 3 - adobe.com

ActionScript started as an object-oriented language for Macromedia's Flash authoring tool, now developed by Adobe Systems as Adobe Flash. The first three versions of the Flash authoring tool provided limited interactivity features. Early Flash developers could attach a simple command, called an "action", to a button or a frame.
