Safe Lifting Techniques. Back injuries account for about one in every five job-related injuries in workplaces. Disabling back injuries are no laughing matter for workers who lose time from work or from personal activities. The sad truth is that most of the pain and lost time can be prevented if you are aware of how the back functions and how to lift safely to protect your back.

Continuous Manual Handling Training. When it comes to manual handling safety, the most important thing to remember is that you need to keep everyone thinking about this topic. It is not enough to go through once and let people know about the importance of lifting safety or any of the other safety items.
