Introduction to Statistics in Chemistry¹. To beginning science students the scientific meaning of “error” is very confusing, because it does not exactly match the common usage. In everyday usage “error” means a mistake, but in science an “error” is anything that contributes to a measured value being different than the “true” value.

Introduction to Statistics in Chemistry | Chem Lab

The most scientifically important part of an experiment is your interpretation of your observations. For an analytical chemist, the accuracy and precision of your results is also important. These priorities are reflected in the allocation of some of your lab report grade to these topics.
