armature rewind: The motor runs very hot and slows down after a few minutes of operation! The armature wires will look dark in color relative to the other windings on the armature. A sure sign that the armature has been damaged. The field winding is getting very hot too.

Armature Rewinding - The Motor Doctor

To check the condition of the armature windings, the armature will probably have to be removed from the motor. However, if the motor design has external brush holders, you can unscrew the brush caps and remove the brushes. Depending upon brush size, this may allow access to the commutator without removing the armature from the motor.

If a universal motor or AC series motor is showing such faults, that motor needs a proper maintenance and repair. The motor repair is rewinding of the motor. The motor winding heats up sometime ...

Motor winding. Universal motor repair. part 1

Given the sheer number of different motors and winding patterns, the rewinding process can vary greatly. However, it generally involves cutting the original windings out of the motor's stator or armature and replacing them with new coils made from wire of the same basic type and gauge.
