Beckhoff Plc Programming Manual - Reliefwatch

PLC Lib: Tc2_LON Version: 1.47 2 Introduction The Tc2_LON library is an extensive TwinCAT PLC library for data exchange with LON devices. The communication with these devices is realized via SNVTs (Standard Network Variable Types). These SNVTs are defined in the LONMark (see also LONMARK and LONMARK Network Variables). For each SNVT there

TwinCAT 3 - Getting started - Beckhoff Automation

PLC program to another part of the TwinCAT system. M Flag (Internal) "Flag" variables can only be used within the PLC program itself. Input and output variables allow the PLC program to access inputs and outputs, so variables must be declared for each input and output terminal that needs to be accessed. PLC variables are defined as:
