Best Review Behavioral Analysis Of Maternal Filicide ...

Often, filicide refers to any murder of a child up to the age of 18 years committed by his or her parent (s) or parental figure (s), including guardians and stepparents. Infanticide commonly applies to the murder of a child under the age of one year by his or her parent (s).

An Overview of Filicide - PubMed Central (PMC)

Maternal filicide motives provide a framework for approaching filicide prevention. Suicidality, psychosis and depression elevate risk, as does a history of child abuse. Mentally ill filicidal mothers have very different risk profiles than mothers who fatally batter their children.

Child murder by mothers: patterns and prevention

Abstract. A review of literature on mothers who commit filicide (victims one year of age or older) reveals diverse offender characteristics. Several explanations address the lack of commonalities within this category. First, the ages of the children in the filicide category are quite varied and, as a result, the victims' developmental stages heavily...

Filicide | SpringerLink

Filicide, the murder of a child by a parent, is a multifaceted phenomenon with various causes and characteristics. This review of the existing literature delineates the present state of knowledge regarding filicide and illustrates similarities and differences between offenses perpetrated by mothers and by fathers.
