These are Pentax and Nikon. When Canon switched to autofocus for its film cameras, it introduced an entirely new lens mount - the electronic EF mount - and essentially abandoned its manual focus FD mount. Minolta did the same thing when it switched from its manual focus SR mount in favor of the electronic Maxxum mount.

Using Manual Focus Lenses on Nikon DSLR Cameras

Of these three the Minolta x-700 is best. All three have in lens ttl metering, but the x-700 has P-program mode. This is when you place the camera in P-Program Mode, turn the aperture on the lens to the largest number, and the camera will select the aperture and the shutter speed according to the ttl metering.
