Reducing fleet maintenance costs is a key issue affecting any airline's bottom line. During the development of the 737-600/-700/-800/-900 family of airplanes, Boeing initiated a program to lower the airplanes' overall airframe maintenance costs by as much as 15 percent, relative to the earlier 737-300/-400/-500 family.

The majority of maintenance manuals are customised for a specific fleet, i.e. specific to a particular airline. That way Boeing only provides information that is applicable to those aircraft and even with a given manual you need to be able to filter on applicability to ensure that specific maintenance information is applicable to a specific aircraft.

By the end of that year, more than 4,640 will have entered service. One characteristic that makes the type popular with airlines is that hangar visits are less frequent and lengthy. In developing all 737NGs, Boeing aimed to reduce airframe maintenance cost by 15%, compared with 737 Classics. Several innovations helped reduce MRO costs.
