This is a running 500cc engine for a BSA WM20. engine number WM20101485 makes it from a batch manufactured in 1944. This came out of my WM20 when I had a special engine built. Mechanically, it's a stock WD engine and can be verified working by Ian Wright of ARK motors in the UK. Ian built my other engine and removed this one in the process.

This engine is from BSA M20 Deluxe Serial Number 7805, delivered to the War Office on October 26th 1939. This engine was found in Michigan, United States and was painted in post-WWII olive green during rebuilding in 1952. Although the engine is 4 years earlier than M20 103026, it will be used during the restoration.

**BSA M20—Wikipedia**

I began researching the BSA M20 engine decades ago for a personal project, which was never completed. The extensive notes I made for what was originally intended to be a comprehensive booklet were never fully collated, synchronized, or put in some order of logic. In some cases the same component is discussed in more than one section.

Discontinued in 1963 (1955 for the M20), two engine sizes were listed by the Birmingham Small Arms Company; the 496cc M20 (82mm x 94mm), and the 591cc M21 (85mm x 105mm up to 1938, and 82mm x 112mm thereafter). Both bikes started out with hand change, rigid frames and girder forks. That was pretty much the pre-war state-of-the-sidevalve-art.
