Managing Cancer Pain at Home. If you have pain from cancer that has spread or other long-term cancer pain, it can exhaust you. This type of chronic or long-term pain can keep you from doing things that you want and need to do. Even with around-the-clock pain medicines, pain often “breaks through” between doses.

### **Managing Cancer Pain at Home**

Other medications used to treat cancer pain are antidepressants, anti-seizure drugs and steroids. Also, there are specialized treatments, such as a nerve block, which is a local anesthetic that's injected around or into a nerve. The block prevents pain messages along that nerve pathway from reaching the brain.
