In particular, Malaysia's adoption of capital controls on September 1, 1998, has prompted increased media attention and has renewed debate on the topic. Modern capital controls were developed by the belligerents in World War I to maintain a tax base to finance wartime expenditures.

## **An Introduction to Capital Controls**

Capital controls are when the governments of nations restrict the

inflow and outflow of capital into the economy. In a free market economy, there should be and would be no borders. However, this is not the case in reality. Countries want to ensure that their economies stay relatively stable in the long run.

### **Capital Controls: Meaning, Types, Benefits and Downside**

Capital controls are generally used to restrict access to foreign assets by domestic citizens or prevent foreigners from purchasing domestic assets. The former, where domestic citizens face the restriction, is known as capital outflow control. On the other hand, when foreigners face restrictions, the controls are known as capital inflow controls.
