MULTI.V - LG USA
Introduction: IPS (In-plane switching) is a screen technology for liquid crystal displays (LCDs). It was designed to solve the main limitations of the twisted nematic field effect (TN) matrix LCDs in the late 1980s.

Reciprocating engine - Wikipedia
Build capabilities for any compressed air or liquid application. Including pump systems, compressed air systems, specialty gas compression systems, landfill gas treatment systems, blower/vacuum systems and instrument air packages.

Case Study 2 Reciprocating Air
A reciprocating engine, also often known as a piston engine, is typically a heat engine (although there are also pneumatic and hydraulic reciprocating engines) that uses one or more reciprocating pistons to convert pressure into a rotating motion.This article describes the common features of all types. The main types are: the internal combustion engine, used extensively in motor vehicles; the ...
