compressive strength of cement, it is necessary to fix the quantity of water to be mixed in cement in each case. This experiment is intended to find out the quantity of water to be mixed for a given cement to give a cement paste of normal consistency and can be done with the help of vicat apparatus. PROCEDURE: 1.

# Read Book Cement Engineering Lab Manual

The behaviour and properties of concrete and concrete making materials can be better understood by conducting first-hand experiments in the laboratory. Thus, the objective of this manual is to make the students aware of different tests required to be performed for these materials as per Indian standards and the acceptable limiting values.
