of Populations 16.1  
Genes and Variation  
16.2 Evolution as  
Genetic Change 16.3  
The Process of

Speciation Evolutionary  
thought today is tightly  
linked to genetics.

Remember,  
populations, not  
individuals evolve. All  
the alleles in a pop.  
added together are  
called the gene pool .

Chapter 16 Evolution of  
Populations 16-1

Genes and Variation

Darwin's original ideas  
can now be under-  
stood in genetic terms.

Beginning with  
variation, we now know  
that traits are con-  
trolled by genes and  
that many genes have  
at least two forms, or  
alleles. We also know  
that individuals of all  
species are heterozy-  
gous for many genes.
