~~Electrical Engineering Telecom Telecommunication~~

Telecommunications Engineering is an engineering discipline centered on electrical and computer engineering which seeks to support and enhance telecommunication systems. The work ranges from basic circuit design to strategic mass developments. A telecommunication engineer is responsible for designing and overseeing the installation of telecommunications equipment and facilities, such as complex electronic switching systems, and other plain old telephone service facilities, optical fiber cabling,

~~Electrical engineering—Wikipedia~~

The Department of Electrical & Computer Engineering offers courses of study leading to the Master of Science in Telecommunications Engineering. This program provides advanced education and research to develop breadth of knowledge and depth of expertise in the engineering of telecommunication networks and systems.

~~Telecommunications Research Projects—Engineering~~

Electrical engineering is an engineering discipline concerned with the study, design and application of equipment, devices and systems which use electricity, electronics, and electromagnetism. It emerged as an identifiable occupation in the latter half of the 19th century after commercialization of the electric telegraph, the telephone, and electrical power generation, distribution and use.
