Acoustical Engineering is a sub-section of engineering, a science of designing and building structures and machinery - but this area deals specifically with sound and noise vibration. Acoustical Engineers design and construct buildings (structural and interiors) and machinery, amongst other things, that are concerned with the science of sound.

'Engineering acoustics' is a teaching textbook that can serve as a tool for self-study and as a compendium for lectures as well. One of the author's goals is not only to describe how the topic develops but also why a specific way is chosen. The explanations do not restrict themselves to mathematical
