~~Cell Types Gizmo : Lesson Info : ExploreLearning~~
Gizmos are interactive math and science simulations for grades 3-12. They help students develop a deep understanding of challenging concepts through inquiry and exploration.

~~Home | ExploreLearning Gizmos, Reflex, and Science4Us ...~~
In the new Cell Types Gizmo, students are introduced to the diversity of cells that exist in nature, from bacteria and protists to specialized animal cells such as neurons and red blood cells. Along the way, students will learn how to focus a microscope and how to apply special tests to determine if a sample is alive.

~~Gizmo of the Week: Reaction Time 1 | ExploreLearning News~~

Teacher may utilize the “Suggested Lesson Sequence” section in the ExploreLearning Teacher Guide and accompanying Student Exploration Sheet in teaching the content/concept. In providing practice for MAFS.FSA, teachers can use the question stems and facilitate the use of the Gizmo through various modes.

Measuring Motion Student Exploration Sheet-French . This is the French translation of the Student Exploration Sheet Best For: 3rd Grade, 4th Grade, 5th Grade Science . Gizmo User from International, unspecified - ExploreLearning Staff

~~New Gizmo: Cladograms | ExploreLearning News~~

Students can explore questions like these in the Embryo Development Gizmo. They study the development of five

Online Library Explore Learning Gizmo Student Exploration Circuit Builder Answer Key

embryos (chicken, fish, frog, mouse, and human) to see when they can identify each one. They can then hypothesize which organisms are more or less related. Then, students can take a closer look at embryo development in mammals.

~~Gizmo of the Week: Evolution ... - Explore Learning News~~

The Exploration Sheet includes some questions that activate prior knowledge and others that allow students to record their learning during an activity. A short multiple-choice assessment is administered at the end of each Gizmo to measure student learning. All of these are of high quality and rigorous enough to be useful in any classroom.

~~Genetic Engineering Gizmo : Lesson Info : Explore Learning~~

Cell Structure. Select sample cells from a plant or animal and place the cells on a microscope to look inside the cells. Information about their common structures is provided (and the

Online Library Explore Learning Gizmo Student Exploration Circuit Builder Answer Key

structures are highlighted), but you will need to move your microscope slide to find all the different structures.

Genetic Engineering Student Exploration Document Translated Into French . This is the Genetic Engineering Student Exploration Document Translated Into French. Best For: Earth/Space Science, Middle School Life Science, Middle School Physical Science . Gizmo User from International, unspecified - ExploreLearning Staff

~~New Gizmo: Cell Types | ExploreLearning News~~

The Evolution: Mutation and Selection Gizmo allows students to simulate reproduction, mutation, predation, and evolution of a species of insect. The color of the environment is adjusted, and over time, insects that are colored most like their environment exhibit higher probability of survival than bugs that are less

Online Library Explore Learning Gizmo Student Exploration Circuit Builder Answer Key

optimally colored.

~~Educator Spotlight: Susan Stanbery | Explore Learning News~~

Students can try their hand at reconstructing these relationships using the Cladograms Gizmo. In the Gizmo, students first determine which traits are shared by different organisms in a group. Students then try to create the most parsimonious cladogram, or the cladogram that would require the fewest evolutionary changes to occur.

~~Measuring Volume Gizmo : Lesson Info : ExploreLearning~~

Explore a wide variety of cells, from bacteria to human neurons, using a compound light microscope. Select a sample to study, then focus on the sample using the coarse and fine focus controls of the microscope. Compare the structures found in different cells, then perform tests to see if the sample is alive.

Historically, teachers tend to teach how they were taught. I am proud to say that we have a large number of teachers who want to leave that model behind and move toward facilitating mathematical understanding in their students. Gizmos support that goal by providing teachers with both the teacher guide as well as the student exploration guide.

~~Gizmo of the Week: Embryo Development | ExploreLearning News~~

Explore statistics using student-generated data in the Reaction Time 1 Gizmo. Students generate their own reaction time data by clicking the spacebar to catch a falling object. After collecting data, the Student Exploration Sheet covers statistics concepts

Online Library Explore Learning Gizmo Student Exploration Circuit Builder Answer Key

like mean and outliers. In the last activity, students are paired and compete to hone their reaction times and generate statistics like median, mean, and mode as a team.
