In 1946, Von Neumann proposed a model of the computer for processing programs. It contains five components. They are; 1) Memory: It is used to store information that is data and program. 2) Processing Unit: It performs the actual computation to process the given information.

Introduction to Computing Systems: From Bits & Gates to C—ucrr
Find Introduction To Computing Systems by Yale N Patt, Sanjay J Patel at Biblio. Uncommonly good collectible and rare books from uncommonly good booksellers

Introduction to Information Systems for Health Information—ucrr
The lab portion of it dealt with a computer language known as the LC-3, and it isn't nearly as versatile as C, C++, etc. Then again, LC-3 is basic, low level assembly language, so I guess it's to be expected. The assignments they gave us were pretty annoying. The content of the class overall, for me at least....

Introduction to Computing Systems
Health information management (HIM) students and professionals must learn everything they can about the basics of electronic health records (EHRs), general healthcare computer systems, data retrieval, and other EHR system topics. Introduction to Information Systems focuses on how these systems and issues affect, and are affected by, the HIM ...

CS:APP3e, Bryant and O'Hallaron
ughh I know! I'm in that class too, but luckily since everyone has to take it a bunch of people on campus have one, I got one for \$20 you probably could too!
