Jellyfish: A Natural History, Lisa-ann Gershwin - Amazon.com

Because jellies have no bones or other hard parts, finding jellyfish fossils is rare. But in 2007, a group of scientists including Allen Collins from the Smithsonian National Museum of Natural History, discovered some beautifully-preserved jellyfish fossils buried in Utah from 505 million years ago.

Jellyfish : a natural history (eBook, 2016) [WorldCat.org]

Pliny the Elder reported in his Natural History that the slime of the jellyfish "Pulmo marinus" produced light when rubbed on a walking stick. [112] In 1961, Osamu Shimomura extracted green fluorescent protein (GFP) and another bioluminescent protein, called aequorin , from the large and abundant hydromedusa Aequorea victoria , while studying ...
