21 - Neutral Territory .

In this lesson we focused on neutralization reactions and how to predict the products of a neutralization reaction. Basically, a neutralization reaction is between a strong acid and a strong base in an aqueous solution.

This Drip, Drip, Drip
Lesson Plan is suitable
for 2nd - 6th Grade.
Students gather
scientific data and be
able to utilize the data
to generalize results
over a long period of
time. They use the
appropriate tools to
measure quantities of
liquids and analyze the
data to determine the
cost of a leaky faucet.
