A lens with a low f-number (wide maximum aperture), is a better quality lens and allows you to do more with it. For example, such a lens is “brighter,” allowing you to take photos in low ambient light conditions, yet still register a quality exposure. In addition, these bright lenses will enable you to achieve a very shallow depth of field.

Lighting plays a crucial rôle in photography. It can bring a photograph to life, it can generate effects, including spectacular shadows or silhouettes, or it may have a distinctly negative influence by creating unwanted glare and reflections. This is a quick guide to introduce the beginner to one of the most important aspects in photography: [...]
