For the last couple of years I have been participating in and contributing to the Mind & Life Institute's Mapping the Mind initiative. Among scientific researchers this topic primarily involves mapping out the wiring and firing of various neural networks in the brain, and indeed for those with strong materialist inclinations (which includes most scientists) mapping the mind can only really ...

My mind immediately jumped to the ideals of D&I work: someone's full self being offensive is not possible because if someone has done the work, they will know that bringing one's full self also requires being respectful and sometimes adapting behaviors to create an inclusive environment. But we also know that this work is developmental, and ...

Documentary and Digital Journalism The projects on this playlist mark the convergence of interactive documentary and digital journalism; two forms that, despite their distinctive institutional traditions, share common cause at the frontiers of fact-based storytelling.

Mapping the Intersection of Two Cultures: Interactive ...

This intersection of social justice ideals and business imperatives in the work of D&I is a tricky one to navigate, mostly because people and their motivations are tricky to navigate. You can't always anticipate the right moves or the right programs or the right timing. However, you can understand the basic rules of the road.

Mapping the Intersection of Science & Philosophy

On a basic level, any commercial mapping company will offer this ability. These are the distinguishing factors from Google Maps; the ability to add your blueprint, designs, and more. That effort, though, remains surface-level. What you need is to dig deeper, and that's where the intersection with SaaS comes into play.
