Wanda M. Haschek, Kenneth A. Voss, in Haschek and Rousseaux's Handbook of Toxicologic Pathology (Third Edition), 2013. 8 Summary/Conclusion. Mycotoxins are a structurally and functionally diverse group of organic compounds that affect humans and animals. They can affect all organ systems, but individual mycotoxins usually target specific organ systems.

### **Mycotoxins - an overview | ScienceDirect Topics**

Mycotoxin interactions with other factors make it difficult to determine safe levels of individual mycotoxins. Mycotoxin effects are affected by factors such as animal species, gender, age, duration of exposure, and stresses of the environment and production. Animals under environmental or production stress may show the more pronounced symptoms.
