An operating model describes how an organization delivers value, as such it is a subset of the larger concept 'business model'. A business model describes how an organization creates, delivers and captures value and sustains itself in the process. An operating model focuses on the delivery element of the business

Operation and Modeling of the MOS Transistor (□□)

Operational models are like building blocks that can be arranged to best achieve an organization's financial and social objectives. Model combinations occur within a social enterprise (Complex Model) or at the level of the parent organization (Mixed Model).
