Two-Stroke Vs. Four-Stroke Outboards: Advantages ...

Two-stroke outboards don't have internal engine oil, but instead use two-stroke oil that is blended into the fuel to lubricate the cylinder walls and other engine internals. This is one of those areas where it doesn't pay to cheap out; always use the manufacturer's recommended two-stroke oil, even if it's more expensive than the cheapest jug on your marine shop's shelves.

I love the smell of two-stroke exhaust in the morning. And if your outboard was new during the Reagan administration, you know what I mean. Those old outboards were built tough, and plenty of them are still running strong today. Like anything mechanical, however, an old outboard needs some love. Rubber ages, parts wear, and corrosion runs its ...

Two stroke motors are more efficient than four strokes for a few reasons. 1 is the displacement, they generally have smaller combustion chambers, which means less fuel burned. 2 is the fact that they have fewer moving parts, which decreases the constant load on the engine, allowing it to burn the air-fuel mixture more efficiently, and reach much higher revolutions per minute.
