How to Save a Microsoft Word Document as a Web Page

Where To Download Save Url To Wordpress

I loaded them from URL (fabric.loadSVGFromURL). When I use JSON.stringify(this.canvas), it saves the paths of the svg images into a json. If I saved all the paths of them, the json file will be too large, so I'm wondering if there is anyway that I can save only the url src of these SVG images (also I need to be able to load them to the canvas as well).
