Sihi Pumps, Nash Pump Replacements
The SIHI LEMD vacuum pump is available in single-stage designs with suction capacities up to 450 m³/h (265 cfm) and suction pressures from 33 to 1013 mbar (24 to 760 Torr) without additional boosting equipment. The working range can be extended down to 8 mbar (6 Torr) by connecting a gas ejector to the pump. LEMD 162 Typical

industries

Sihi Lem Manual Nash Pumps

The 'liquid ring' pump takes its name from its principle of operation. A cool liquid is introduced into a round casing and, due to centrifugal force, forms a nearly concentric ring around the pump casing. SIHI LEM series pumps are capable of handling many vapors, and gases using service liquids compatible with the metal parts and elastomers ...

Series LEM, LEL | Flowserve SIHI

Sihi Lem Manual Nash Pumps SIHI LEM series pumps are capable of handling many vapors, and gases using service liquids compatible with the metal parts and elastomers of the Page 5/28 Liquid ring vacuum pumps of the series LEM/LEL are single-stage displacement pumps of uncomplicated and robust construction with the following

SIHI specialises in liquid pumps, vacuum pumps and systems. The organisation provides a broad range of engineered solution to support the fluid handling requirements of the process industries. With over 10 manufacturing centres, 60 sales offices and more than 100 service centres around the world, SIHI is strategically positioned to provide an extensive support network at a local level.

SIHI Group - Liquid and Vacuum Pump Solutions

The stop valve (manual) is used for either fully opening or fully closing the operating liquid supply to the pump, before starting or after stopping the pump respectively. The control valve is a regulating valve and is used for regulating the operating liquid entering the pump for its optimum performance (the flow rate should be set as per
