Social and Economic Networks (□□)

Network structures play an important role in the organization of some significant economic relationships. Informal social networks are often the means for communicating information and for the allocation of goods and services which are not traded in markets. Among such goods one can mention not only invitations to parties and other forms of ...

A Strategic Model of Social and Economic Networks

observed social and economic networks appears in Chapter 3.

2.1 Representing Networks As networks of relationships come in many shapes and sizes, there is no single way of representing networks that encompasses all applications. Nevertheless, there are some representations that serve as a useful basis for capturing many applications.

Matthew O. Jackson: Social and Economic Networks

Networks of relationships help determine the careers that people choose, the jobs they obtain, the products they buy, and how they vote. The many aspects of our lives that are governed by social networks make it critical to understand how they impact behavior, which network structures are likely to emerge in a society, and why we organize ourselves as we do.

Social and Economic Networks

Abstract. The payoff to an individual from an economic or social activity depends on the network of connections among individuals. Over time individuals form and sever links connecting themselves to other individuals based on the improvement that the resulting network offers them relative to the current network.

The Evolution of Social and Economic Networks - ScienceDirect

Thus, as n becomes large, if the average degree grows more slowly than n (which would be true in most large social and economic networks in which there are some bounds on the number of links that agents can maintain) then it must be that ρ tends to 0 and so the clustering (both average and overall) also tends to 0.
