1.1.4 Characteristics of Spacecraft Necessary to Choose a Launch Vehicle The spacecraft needs to work well with a launch vehicle since designing a new launch vehicle would not be the best course of action. Some of the criteria required are the spacecraft's overall dimensions, mass, altitude destination, and attitude destination.

Structures and Mechanisms ESA / Enabling & Support / Space Engineering & Technology A spacecraft's structure is its underlying body, tasked with keeping the spacecraft suitably rigid to support its instruments and subsystems. Mechanisms, conversely, are onboard devices whose function is based around movement.
