The French-made Fergusons used the Standard engines, for example Hotchkiss-Delahaye made a version of the Standard 23C Diesel. C.1956 Next came the FE-35 tractor with its grey/bronze paint scheme. Standard now developed the 23C diesel engine from the 20C, using a Ricardo-designed cylinder head and larger cylinder bore.

Ferguson Diesels? - SmokStak

Update. Well it appears what I have is NOT the 23C engine I thought I had. I was a bit confused when the plates I had Doubleboost make to weld to the cylinder liner appeared to be undersized (I quoted measurements from the Manual regarding the bore size.

The Standard wet liner inline-four engine was a 2,088 cc inline four cylinder petrol engine produced by the Standard Motor Company. Originally developed for the Ferguson TE20 tractor, it was widely used for Standard passenger cars of the 1950s, most notably the Vanguard. Later it was successfully used in Standard's popular early generation Triumph TR series sports cars.

Standard wet liner inline-four engine - Wikipedia

Problem is Bob with the old 23C Engine you have to lift crank out through flywheel end of the block So stand block on end fasten lifting eye onto flywheel mounts then lift out with engine crane. (sighs) You therefore have to get pistons and rods out before you can remove the crankshaft. (Photo from service manual)

Massey Ferguson 35 Engine Rebuild Kits - Antique Tractors

As anyone who read my last post will know ive bought a 4yl 35. While it is in bits i am tempted to replace the timing chain to rule this out of any starting issues that may arrise when i get it running. What is a good way of telling that the chain needs replacement? On looking though the fuel pump window at the timing marks, the appropriate timing letter is a good few mm away from where it ...
