Study Guide Inscribed Angles An inscribed angle of a circle is an angle whose vertex is on the circle and whose sides contain chords of the circle. We say that $LDEF$ intercepts DE The following theorems involve inscribed angles. If an angle is inscribed in a circle, then the measure of the angle equals one-half the measure of its intercepted arc.

1-4 Study Guide and Intervention Angle Measure Measure Angles If two noncollinear rays have a common endpoint, they form an angle. The rays are the sides of the angle. The common endpoint is the vertex. The angle at the right can be named as $\angle A$, $\angle BAC$, \widehat{A} — \widehat{CAB} , or \widehat{A} . A right angle is an angle whose measure is 90 . An acute angle has measure less ...
