Submarine Cable Systems - Below is a link to an interactive Submarine Cable Map that depicts US Domestic and International active subsea cable systems and their landing stations. In addition, below is a list of Proposed / Planned Submarine Cable Systems.

Submarine Cable Systems and map

A submarine communications cable is a cable laid on the sea bed between land-based stations to carry telecommunication signals across stretches of ocean and sea. The first submarine communications cables laid beginning in the 1850s carried telegraphy traffic, establishing the first instant telecommunications links between continents, such as the first transatlantic telegraph cable which became ...

Submarine communications cable - Wikipedia

This sounds like a job for a custom map. Our cartographers can design a map that showcases the data points that matter to you. This might be your network, region of interest, or key submarine cables. And it might be a printed piece for your office wall or an interactive depiction to add to your website.
