## **Tape Casting: Theory and Practice | Ceramics | General ...**

Tape casting is a well-established practice for making ceramic substrates in microelectronics. The possible thicknesses are in the range of 0.01 to a few millimeters. Such parts can impossibly be obtained by pressing or extruding. It is a wet-shaping technique that uses a tape cast suspension with mostly pseudoplastic properties.

## **Tape Casting - an overview | ScienceDirect Topics**

Tape casting is a cost-effective production method, which has been widely used for production of ceramic sheets.

## **Tape Casting and Lamination | Request PDF**

Tape casting (also called doctor blading and knife coating) is a casting process used in the manufacture of thin ceramic tapes and sheets from ceramic slurry. The ceramic slurry is cast in a thin layer
