It was during the first epoch that the outer space development regime was created, and so was space law. Visionaries had written about outer space for centuries but it was the Soviet Sputnik launch in 1957, which marked the beginning of the space race. At this time, the international political environment was still freshly tempered by World War I and II.

History - OuterSpaceDevelopment

The Geostationary orbit has been colonized and developed. Key thinkers are looking towards the development of other regions of outer space including, Low Earth Orbit, Near Earth Orbit, asteroids, Earth's Moon, Mars and elsewhere. Only a handful of experts and students are aware of the outer space development phenomenon.
