The Fragility Of Things Self

In The Fragility of Things, eminent theorist William E. Connolly focuses on several self-organizing ecologies that help to constitute our world. These interacting geological, biological, and climate systems, some of which harbor creative capacities, are depreciated by that brand of neoliberalism that confines self-organization to economic markets and equates the latter with impersonal rationality.

The Fragility of Things: Self-Organizing Processes ...

It introduces into the democratic and pluralistic ethos he has long advocated a new element: an informed sense of the 'fragility of things,' an awareness that human affairs are undertaken in a world of interacting systems of self-organization that place no special value on human flourishing or even survival. Connolly argues that an appreciation of the fragility of things must be incorporated into efforts to advance egalitarian, pluralist, and democratic values."

Duke University Press - The Fragility of Things

The contemporary fragility of things can now be stated in stark terms: As neoliberal capitalism expands, as it assumes hegemony over more aspects of life, as it fosters visible inequality between regions, and as it supports rapid growth in the world's population, particularly in areas that are ecologically challenged, its intersections with a large number of self-regulating, non-human systems become more strained and precarious.

Self-doubt occurs when we are lack of confidence or feeling incapable of doing things we need to do. People who doubt about themselves panic about things would go out of control or not going the way as expected. A certain level of self-doubt is good because it indicates you understand what you need to improve in order to do a better job.
