Methods associated with ethnography. All of these ethnographic methods can be very valuable in gaining a deeper understanding of a design problem. Usability practitioners often make use of these in order to develop their understanding of the relevant domain, audience (s), processes, goals and context (s) of use.

Ethnography: When and How to Use It | Spotless

Interviewing. As no research interview lacks structure [9] most of the qualitative research interviews are either semi-structured, lightly structured or in-depth. [9] Unstructured interviews are generally suggested in conducting long-term field work and allow respondents to let them express in their own ways and pace,...

Qualitative research method-interviewing and observation

Ethnography is defined as an illuminative account of social life and culture in a particular social system based on multiple detailed observations of what people actually do in the social setting being observed. Ethnography can be described as both qualitative and quantitative research methods that are used by sociologists when studying specific groups, communities or institutions found being ...

Ethnography - Wikipedia

Oct 10, 2016. Ethnography is the systematic study of people and their cultures. It refers both to the process that is used to study people as well as the outcome of this process. The term “ethnography” comes from the Greek words “ethnos” (which means “people” or “nation”) and “grapho” (which means “I write”).

9 Pros and Cons of Ethnography - Green Garage

We followed the ethnographic approach outlined by Pink (2007) in the analysis of the transcripts from the problem-solving activity and post-activity interview. Pink described ethnography as a “process of creating and representing knowledge (about society, culture, and individuals)” that remains as accurate as possible to the context “through which the knowledge was produced” (p. 22).

Ethnographic Approaches - an overview | ScienceDirect Topics

Most ethnographic research makes considerable use of participant observation, usually triangulated with interviews, with “key informants” in particular. Triangulation is particularly important as one method on its own is not usually reliable.

How to... use ethnographic methods and participant ...

The purpose of this paper is to describe a method of interviewing where walking is explicitly the focus. The interviews were one element of a qualitative study, which was part of a multi-method prospective outcomes of injury study. Four participants were purposively chosen for follow up because they had an injury following a pre-existing disability.
