The Mars Project

Project Mars is an interesting science fiction story. Written by Von Braun in German in 1950, while he was at Fort Bliss, Texas for the Army, it tells the tale of a manned Mars expedition. Interestingly, it is one of the few science fiction novels I have read with a 65 page technical appendix of equations.

The Mars Project

The Mars Project (German: Das Marsprojekt) is a non-fiction scientific book by the German (later German-American) rocket physicist, astronautics engineer and space architect, Wernher von Braun. It was translated from the original German by Henry J. White and first published in English by the University of Illinois Press in 1953.

Mars One

Mars One consisted of two entities: the not-for-profit Mars One Foundation, and the for-profit company Mars One Ventures which was the controlling stockholder of the for-profit Interplanetary Media Group that also managed the broadcasting rights. The Mars One Foundation, based in the Netherlands, managed the project.

Scientists are learning more about the planet Mars every year and that makes now a perfect time to use it as the subject of a science fair project. It is a project that both middle and high school students can pull off and they can take many different approaches to create a unique and impressive display.

The Planet Mars Science Fair Project Ideas

The Mars Project is a technical specification for a manned mission to Mars that von Braun wrote in 1948, with a provisional launch date of 1965.[1] He envisioned an enormous scientific expedition involving a eet of ten spacecraft with 70 crew members that would spend 443 days on the surface of Mars before returning to Earth.[1]

"Project Mars" is a fictionalized tale about the first manned expedition to the Red Planet. As a science fiction novel, it has little to recommend it. Its stodgy style, tortured dialog passages and primitive narrative structure are even worse than most other contemporary books of the genre—which did not set the bar very high themselves.

The Mars Project. Today von Braun is recognized as the person most responsible for laying the groundwork for public acceptance of America's space program. When President Bush directed NASA in 1989 to prepare plans for an orbiting space station, lunar research bases, and human exploration of Mars, he was largely echoing what von Braun proposed in The Mars Project.
