Self-concept is inherently phenomenological, that is, it refers to the person's own view of self.

Accordingly self-concept is almost always assessed through self-report. Commonly used self-report methods, rating scales, checklists, Q-sorts, and free response are described.

Concept, published by Nebraska in 1974 and 1979, evaluated psychological and sociological studies of self-concept and self-esteem. Looking at a plethora of tests, Wylie found in 1974 that very few had been adequately conceived or implemented. Many produced results that were unverifiable or specious.
