What Engine Is In A

An engine or motor is a machine designed to convert one form of energy into mechanical energy. Heat engines, like the internal combustion engine, burn a fuel to create heat which is then used to do work. Electric motors convert electrical energy into mechanical motion, pneumatic motors use compressed air, and clockwork motors in wind-up toys use elastic energy. In biological systems, molecular motors, like myosins in muscles, use chemical energy to create forces and ultimately motion.

engine - English-French Dictionary WordReference.com

Define engine. engine synonyms, engine pronunciation, engine translation, English dictionary definition of engine. n. 1. a. A machine that converts energy into mechanical force or motion. b. Such a machine distinguished from an electric, spring-driven, or hydraulic motor...
