If your poop is...Hard, in pieces, and you have to strain to pass it. The most common culprit is inadequate fiber intake. The average U.S. adult only downs about 15 grams of fiber a day—a fraction of the recommended 25 grams per day for women and 38 grams per day for men. Read labels and keep a food journal for a week to track how much fiber you're...

7 Things Your Poop Says About You - Prevention

The color of your stool depends on a couple of things: your diet and how much bile is in it. Bile is a yellow-green fluid that helps digest fats. A healthy stool, then, should reflect a mixture of all the colors of the food you eat and that bile. Almost any shade of brown, or even green, is considered OK.
