A wiring diagram usually gives information about the relative position and arrangement of devices and terminals on the devices, to help in building or servicing the device. This is unlike a schematic diagram, where the arrangement of the components' interconnections on the diagram usually does not correspond to the components' physical locations in the finished device.

Find a car wiring diagram. Every day in every auto repair forum I see people ask for a car wiring diagram. It's really an impossible request. It shows the poster doesn't understand how car makers design their wiring diagrams and they assume that the wiring diagrams are the same for each engine in that model year.
