### *Oracle Work in Process User's Guide*

Oracle Work in Process is a complete production management system. Work in Process is part of Oracle Applications, an integrated suite of business solutions. Work in Process supports discrete, project, repetitive, assemble-to-order, work order-less, or a combination of manufacturing methods.

### *Oracle Work in Process User's Guide*

Component picking, obtaining requirements for specific jobs and schedules, is the process of moving items from source locations and issuing them to work orders. In previous versions of Oracle Work in Process, items were issued from locations specified for each component on the bill of material.

### *Difference Between SOPs v Work Instructions v Procedures*

As you charge resources, outside processing, and overheads, work in process valuation automatically absorbs your payroll,
